## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. In response to the Communications dated April 12, 2004, claim 1 is active in this application.

### ***Claim Rejections – 35 U.S.C. § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claim 1 is rejected under 35 U.S.C 102(b) as being anticipated by Mensch [U.S. Patent #5,438,681].

With respect to claim 1, Mensch discloses, in column 16, a memory including: a built-in address memory unit [204 of figure 3] located in front end of the memory, of which comprises several address buffers [106 of figure 3 – it is being interpreted as being one single unit with the memory unit], and there is a pointing design between

Art Unit: 2827

each address buffer [109 of figure 3] and the corresponding data block in the memory; the several address buffers located in the aforementioned memory address unit provide the external pins [see column 16] to enter address data in advance and further to select quickly the corresponding data block that an address buffer points to so as to rapidly change the data address for data transmission and access [see columns 2 and 3]. In the cited sections, Mensch indicated that, with the described structure, a memory system's speed of operation can be enhanced.

### ***Conclusion***

4. When responding to the Office action, Applicants are advised to provide the Examiner with line and page numbers of the application and/or references cited to assist the Examiner in the prosecution of this case.
